

**Explanatory Notes**

All cases (locked and unlocked) admitted to hospital between 01 December 2024 and 28 February 2025 have been included. Only cases where the necessary data are available have been included in the denominator for each individual analysis.

At hospital level, runcharts are compared to hospitals within the same ICB.

The results for process measures for which fewer than 10 cases have available data will not be reported. Instead the value will be marked as 'Insufficient data'.

The NELA standards include a newly updated composite standard for CT Scanning and Reporting. The new standard is composed of three metrics: (1) the proportion of patients who had a CT scan that was reported by senior radiologist (ST3+), (2) the proportion of those reported within an hour or less of the scan, and (3) the proportion of those communicated preoperatively between a senior radiologist (ST3+) and senior surgeon (ST3+) to discuss the CT findings.

*NOTE:* due to changes in database structure, time related metrics may be calculated even if a time (NOT date) stamp is not entered. When time is entered as "00:00" and the "Time not known" box is not ticked, this time-stamp will be used for the standard calculation and may negatively affect reported metrics. We would therefore request that every effort is made to enter the time-stamps for the following variables:

- Date and Time of admission to hospital (Q1.9),
- Date and time of CT scan (Q2.7d),
- Date and time CT scan was reported (Q2.7e),
- Date and time of first dose of antibiotics (Q2.10),
- Date and time arrival in theatre (Q4.1).

For better insight to how these standards have been structured, please refer to the **NELA standards document**.

**West Suffolk Hospital**

**2024-25 Reporting Period 9: 01 December 2024 - 28 February 2025**

These plots represent patients having an emergency laparotomy during Year 2024-25 Reporting Period 9 of NELA data collection. This version will be made publicly available via the NELA website. Feedback from participating hospitals is welcome.

**NELA process and outcome measures**

Estimated case ascertainment  
01 December 2024 - 28 February 2025

**Estimated case ascertainment  
(Based on HES/PEDW Data)**

Expected number of cases 37  
Total cases entered 44  
Cases locked 24  
Cases unlocked 20

Proportion of patients who had a CT scan that was reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale before surgery  
01 December 2024 - 28 February 2025

**CT reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale before surgery.**

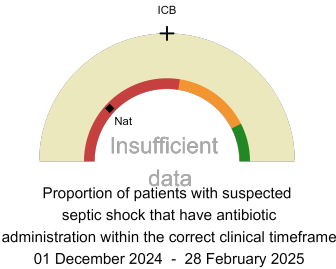

National mean 14%  
ICB mean 17%  
Number of patients included 32  
Data completeness 100%

Proportion of patients with suspected sepsis or infection that have antibiotic administration within the correct clinical timeframe  
01 December 2024 - 28 February 2025

**Combined Infection management standard - antibiotic administration within the correct clinical timeframe**

National mean 23%  
ICB mean 41%  
Number of patients included 20  
Data completeness 91%

**Septic Shock - antibiotic administration within the correct clinical timeframe**

National mean 24%  
ICB mean 50%  
Number of patients included 1  
Data completeness 33%

**Sepsis - antibiotic administration within the correct clinical timeframe**

National mean 17%  
ICB mean 56%  
Number of patients included 7  
Data completeness 78%

**Infection - antibiotic administration within the correct clinical timeframe**

National mean 36%  
ICB mean 48%  
Number of patients included 20  
Data completeness 91%

**Non-elective, immediate surgery cases, arriving in theatre within 6 hours.**

National mean 11%  
ICB mean 20%  
Number of patients included 26  
Data completeness 100%

Risk of death documented before surgery  
01 December 2024 - 28 February 2025

**Risk documented before surgery**

National mean 75%  
ICB mean 87%  
Number of patients included 44  
Data completeness 100%

Risk of death documented after surgery  
01 December 2024 - 28 February 2025

**Risk documented after surgery**

National mean 56%  
ICB mean 49%  
Number of patients included 44  
Data completeness 100%

Admitted to critical care following surgery when the  
risk of death  $\geq$  5% (Excludes patients who  
died in theatre or with a decision to palliate)  
01 December 2024 - 28 February 2025

**Admitted to Critical Care  
(risk of death  $\geq$  5%)**

National mean 61%  
ICB mean 29%  
Number of patients included 21  
Data completeness 100%

Consultant surgeon and anaesthetist present in  
theatre when risk of death  $\geq$  5%  
01 December 2024 - 28 February 2025

**Consultant Anaesthetist &  
Consultant Surgeon in theatre  
(risk of death  $\geq$  5%)**

National mean 78%  
ICB mean 83%  
Number of patients included 20  
Data completeness 80%

**Perioperative Assessment by a member of the geriatrician-led multidisciplinary team for patient aged 65 or over and frail (CFS ≥ 5) or 80+**

National mean 28%  
ICB mean 11%  
Number of patients included 15  
Data completeness 88%

**Median postoperative length of stay**

National median 10 days  
ICB median 11 days  
Number of patients included 24  
Data completeness 100%

**Mean postoperative length of stay**

National mean 15 days  
ICB mean 15 days  
Number of patients included 24  
Data completeness 100%

**Integrated Care Board**

West Suffolk Hospital is part of the NHS Suffolk And North East Essex Integrated Care Board ICB. This comprises Ipswich Hospital, West Suffolk Hospital, Colchester General Hospital.
