

Explanatory Notes

All cases admitted to hospital between 01 August 2024 and 31 January 2025 have been included. Only cases where the necessary data are available have been included in the denominator for each individual analysis.

The results for process measures for which fewer than 10 cases have available data will not be reported. Instead value will be marked as 'Insufficient data'.

At ICB level, runcharts are compared to national quartiles.

NHS North East And North Cumbria Integrated Care Board

2024-25 Reporting Period 5: 01 August 2024 - 31 January 2025

These plots represent patients who did NOT have an emergency laparotomy during Year 2024-25 Reporting Period 5 of NELA data collection. This version will be made publicly available via the NELA website. Feedback from participating hospitals is welcome.

NELA process and outcome measures

Risk documented prior to non-operative decision.

National mean 47%
Number of patients included 60
Data completeness 100%

Formal assessment of frailty documented.

National mean 65%
Number of patients included 50
Data completeness 60%

CT reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale.

National mean 10%
Number of patients included 57
Data completeness 91%

Proportion of patients in whom staff have proactively identified advance care plans to support the decision-making process.
01 August 2024 - 31 January 2025

Advance care plans to support the decision-making process.
National mean 62%
Number of patients included 60
Data completeness 55%

Proportion of patients who were recognised to be dying who have an individualised end-of-life care plan documented
01 August 2024 - 31 January 2025

Individualised end-of-life care plan documented for patients recognised to be dying.
National mean 74%
Number of patients included 38
Data completeness 50%

Proportion of patients who died in hospital, who received direct input by member of a palliative care team Numerator
01 August 2024 - 31 January 2025

Direct input by a member of a palliative care team for patients who have died in hospital.
National mean 55%
Number of patients included 38
Data completeness 50%

Median post-admission length of stay in patients surviving to discharge (crude value, not risk adjusted)
01 August 2024 - 31 January 2025

Median post-admission length of stay
National median 11 days
Number of patients included 12
Data completeness 100%

Mean post-admission length of stay
National mean 13 days
Number of patients included 12
Data completeness 100%

Median post-decision to not operate length of stay
National median 9 days
Number of patients included 12
Data completeness 100%

Mean post-decision to not operate length of stay
National mean 11 days
Number of patients included 12
Data completeness 100%
