

Explanatory Notes

All cases admitted to hospital between 01 August 2025 and 31 January 2026 have been included. Only cases where the necessary data are available have been included in the denominator for each individual analysis.

The results for process measures for which fewer than 10 cases have available data will not be reported. Instead value will be marked as 'Insufficient data'.

At ICB level, runcharts are compared to national quartiles.

NHS North East And North Cumbria Integrated Care Board

2025-26 Reporting Period 10: 01 August 2025 - 31 January 2026

These plots represent patients who did NOT have an emergency laparotomy during Year 2025-26 Reporting Period 10 of NELA data collection. This version will be made publicly available via the NELA website. Feedback from participating hospitals is welcome.

NELA process and outcome measures

Risk documented prior to non-operative decision.

National mean 68%
Number of patients included 43
Data completeness 100%

Formal assessment of frailty documented.

National mean 67%
Number of patients included 40
Data completeness 79%

CT reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale.

National mean 14%
Number of patients included 42
Data completeness 83%

Proportion of patients in whom staff have proactively identified advance care plans to support the decision-making process.
01 August 2025 - 31 January 2026

Advance care plans to support the decision-making process.

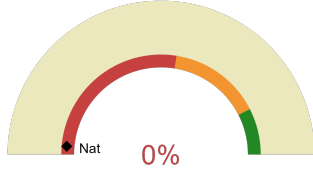

National mean 83%
Number of patients included 43
Data completeness 84%

Proportion of patients who were recognised to be dying who have an individualised end-of-life care plan documented
01 August 2025 - 31 January 2026

Individualised end-of-life care plan documented for patients recognised to be dying.

National mean 77%
Number of patients included 31
Data completeness 74%

Proportion of patients who died in hospital, who received direct input by member of a palliative care team Numerator
01 August 2025 - 31 January 2026

Direct input by a member of a palliative care team for patients who have died in hospital.

National mean 3%
Number of patients included 31
Data completeness 74%

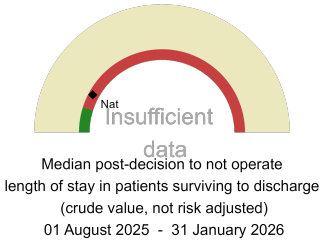

Median post-admission length of stay in patients surviving to discharge (crude value, not risk adjusted)
01 August 2025 - 31 January 2026

Median post-admission length of stay

National median 12 days
Number of patients included 1
Data completeness 100%

Mean post-admission length of stay
National mean 13 days
Number of patients included 1
Data completeness 100%

Median post-decision to not operate length of stay
National median 10 days
Number of patients included 1
Data completeness 100%

Mean post-decision to not operate length of stay
National mean 11 days
Number of patients included 1
Data completeness 100%
