

Explanatory Notes

All cases admitted to hospital between 01 February 2026 and 30 April 2026 have been included. Only cases where the necessary data are available have been included in the denominator for each individual analysis.

The results for process measures for which fewer than 10 cases have available data will not be reported. Instead value will be marked as 'Insufficient data'.

For this report runcharts are compared to national quartiles.

For better insight to how these standards have been structured, please refer to the **NELA standards document**.

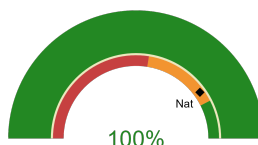

NHS Bath And North East Somerset, Swindon And Wiltshire Integrated Care

2026-27 Reporting Period 1: 01 February 2026 - 30 April 2026

These plots represent patients having an emergency laparotomy during Year 2026-27 Reporting Period 1 of NELA data collection.

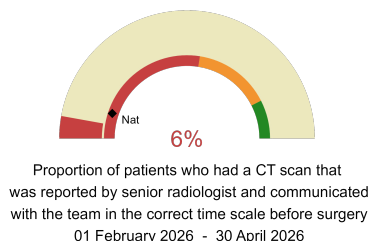

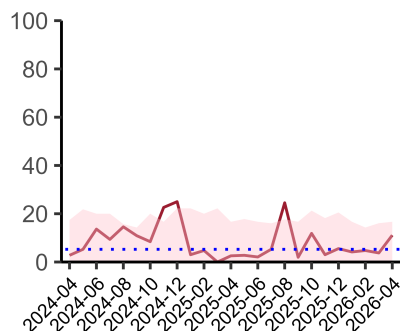

NELA process and outcome measures

Estimated case ascertainment
01 February 2026 - 30 April 2026

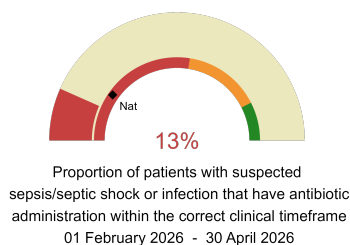

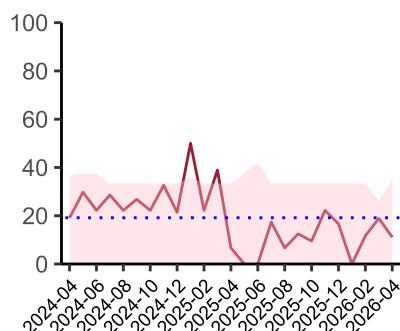

Estimated Case Ascertainment (Based on HES Data)

Expected number of cases 98
Total cases entered 134
Cases locked 39
Cases unlocked 95

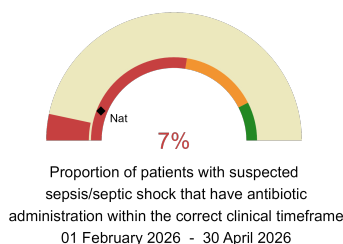

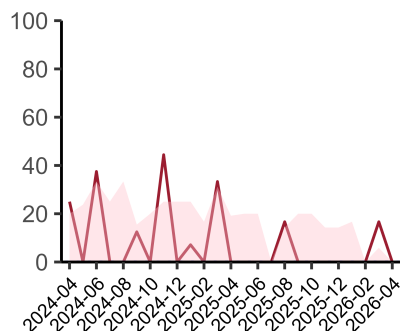

CT reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale before surgery.

National mean 10%
Number of patients included 92
Data completeness 98%

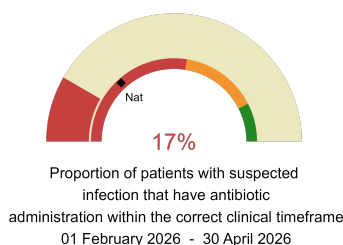

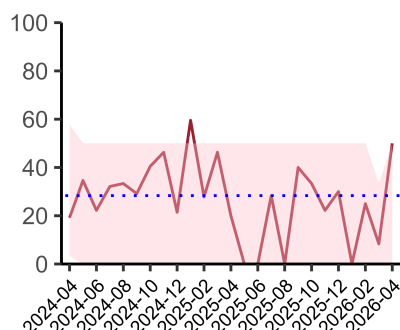

Combined Infection management standard - antibiotic administration within the correct clinical timeframe

National mean 20%
Number of patients included 35
Data completeness 57%

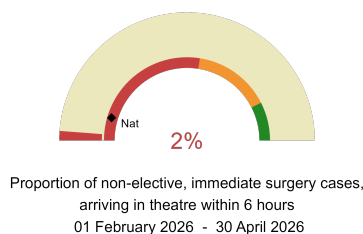

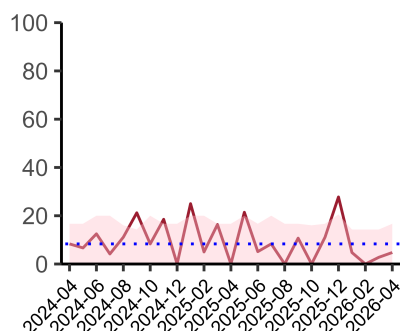

Sepsis/septic shock - antibiotic administration within the correct clinical timeframe

National mean 12%
Number of patients included 18
Data completeness 46%

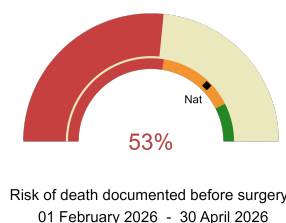

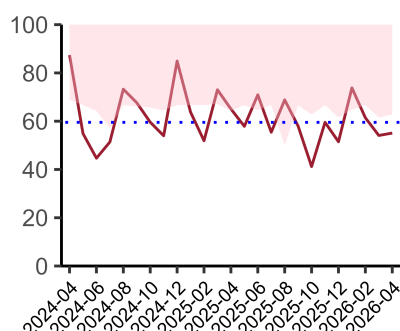

Infection - antibiotic administration within the correct clinical timeframe

National mean 27%
Number of patients included 17
Data completeness 28%

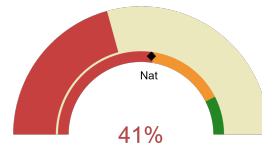

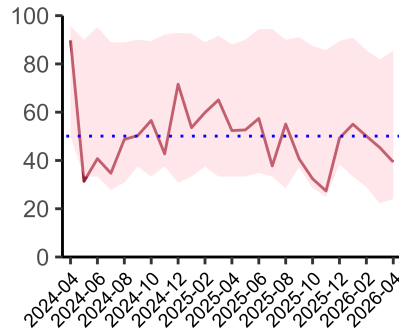

Timeliness - proportion of patients arriving in theatre according to correct clinical timeframe.

National mean 9%
Number of patients included 63
Data completeness 100%

Risk documented before surgery

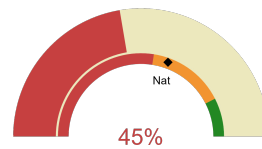

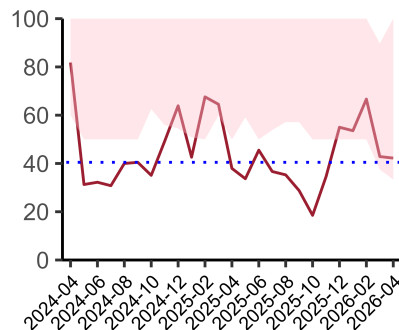

National mean 75%
Number of patients included 134
Data completeness 100%

Risk of death documented after surgery
01 February 2026 - 30 April 2026

Risk documented after surgery

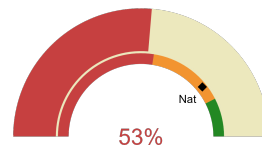

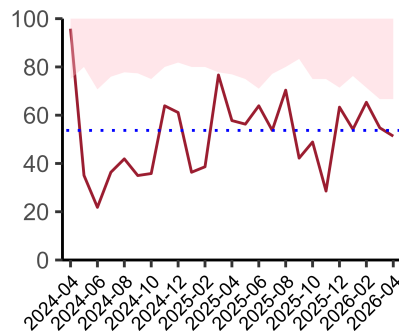

National mean 54%
Number of patients included 134
Data completeness 100%

Admitted to critical care following surgery when the
risk of death $\geq 5\%$ (Excludes patients who
died in theatre or with a decision to palliate)
01 February 2026 - 30 April 2026

Admitted to Critical Care (risk of death $\geq 5\%$)

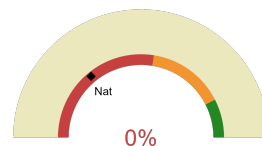

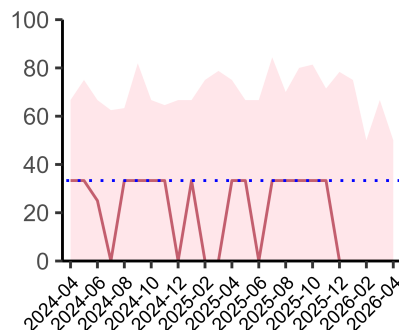

National mean 61%
Number of patients included 102
Data completeness 100%

Consultant surgeon and anaesthetist present in
theatre when risk of death $\geq 5\%$
01 February 2026 - 30 April 2026

Consultant Anaesthetist & Consultant Surgeon in theatre (risk of death $\geq 5\%$)

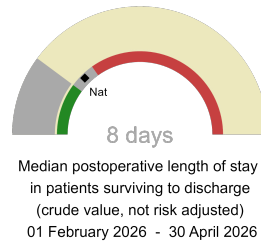

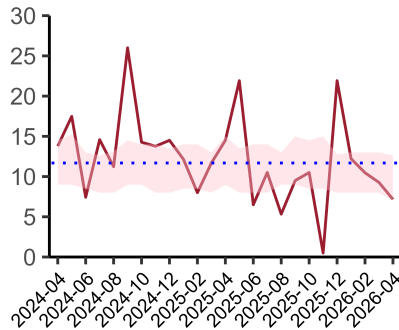

National mean 78%
Number of patients included 82
Data completeness 79%

Perioperative assessment by a member of the older
person specialist
