

Explanatory Notes

All cases admitted to hospital between 01 March 2026 and 31 May 2026 have been included. Only cases where the necessary data are available have been included in the denominator for each individual analysis.

The results for process measures for which fewer than 10 cases have available data will not be reported. Instead value will be marked as 'Insufficient data'.

For this report runcharts are compared to national quartiles.

For better insight to how these standards have been structured, please refer to the **NELA standards document**.

NHS Buckinghamshire, Oxfordshire And Berkshire West Integrated Care

2026-27 Reporting Period 2: 01 March 2026 - 31 May 2026

These plots represent patients having an emergency laparotomy during Year 2026-27 Reporting Period 2 of NELA data collection.

NELA process and outcome measures

Estimated case ascertainment
01 March 2026 - 31 May 2026

Estimated Case Ascertainment (Based on HES Data)

Expected number of cases 137
Total cases entered 174
Cases locked 119
Cases unlocked 55

CT reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale before surgery.

National mean 11%
Number of patients included 115
Data completeness 99%

Combined Infection management standard - antibiotic administration within the correct clinical timeframe

National mean 20%
Number of patients included 59
Data completeness 69%

Sepsis/septic shock - antibiotic administration within the correct clinical timeframe

National mean 13%
Number of patients included 37
Data completeness 66%

Infection - antibiotic administration within the correct clinical timeframe

National mean 25%
Number of patients included 22
Data completeness 22%

Timeliness - proportion of patients arriving in theatre according to correct clinical timeframe.

National mean 10%
Number of patients included 87
Data completeness 100%

Risk documented before surgery

National mean 75%
Number of patients included 174
Data completeness 100%

Risk of death documented after surgery
01 March 2026 - 31 May 2026

Risk documented after surgery

National mean 55%
Number of patients included 174
Data completeness 100%

Admitted to critical care following surgery when the
risk of death $\geq 5\%$ (Excludes patients who
died in theatre or with a decision to palliate)
01 March 2026 - 31 May 2026

Admitted to Critical Care (risk of death $\geq 5\%$)

National mean 62%
Number of patients included 94
Data completeness 99%

Consultant surgeon and anaesthetist present in
theatre when risk of death $\geq 5\%$
01 March 2026 - 31 May 2026

Consultant Anaesthetist & Consultant Surgeon in theatre (risk of death $\geq 5\%$)

National mean 79%
Number of patients included 95
Data completeness 80%

Perioperative assessment by a care of the older
person specialist
01 March 2026 - 31 May 2026

Perioperative Assessment by a member of the geriatrician- led multidisciplinary team for patient aged 65 or over and frail (CFS ≥ 5) or 80+

National mean 29%
Number of patients included 49
Data completeness 58%

Median postoperative Length of Stay

National median 10 days
Number of patients included 120
Data completeness 96%

Mean postoperative Length of Stay

National mean 15 days
Number of patients included 120
Data completeness 96%

Risk-Adjusted Mortality

Number of patients included 127 | 30-day risk-adjusted mortality rate 3.4% | National 30-day mortality rate 6.1%

Integrated Care Board

NHS Buckinghamshire, Oxfordshire And Berkshire West Integrated Care Board ICB comprises Stoke Mandeville Hospital, John Radcliffe Hospital, Churchill Hospital, Royal Berkshire Hospital.
