

Explanatory Notes

All cases admitted to hospital between 01 December 2025 and 28 February 2026 have been included. Only cases where the necessary data are available have been included in the denominator for each individual analysis.

The results for process measures for which fewer than 10 cases have available data will not be reported. Instead value will be marked as 'Insufficient data'.

For this report runcharts are compared to national quartiles.

For better insight to how these standards have been structured, please refer to the **NELA standards document**.

NHS Derby And Derbyshire Integrated Care Board

2025-26 Reporting Period 11: 01 December 2025 - 28 February 2026

These plots represent patients having an emergency laparotomy during Year 2025-26 Reporting Period 11 of NELA data collection.

NELA process and outcome measures

Estimated case ascertainment
01 December 2025 - 28 February 2026

**Estimated Case Ascertainment
(Based on HES Data)**

Expected number of cases 155
Total cases entered 97
Cases locked 84
Cases unlocked 13

Proportion of patients who had a CT scan that was reported by senior radiologist and communicated with the team in the correct time scale before surgery
01 December 2025 - 28 February 2026

CT reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale before surgery.

National mean 11%
Number of patients included 70
Data completeness 100%

01 December 2025 - 28 February 2026

Combined Infection management standard - antibiotic administration within the correct clinical timeframe

National mean 20%
Number of patients included 28
Data completeness 73%

Sepsis/septic shock - antibiotic administration within the correct clinical timeframe

National mean 12%
Number of patients included 10
Data completeness 54%

Infection - antibiotic administration within the correct clinical timeframe

National mean 28%
Number of patients included 18
Data completeness 46%

Timeliness - proportion of patients arriving in theatre according to correct clinical timeframe.

National mean 11%
Number of patients included 63
Data completeness 100%

Risk documented before surgery

National mean 75%
Number of patients included 97
Data completeness 100%

Risk of death documented after surgery
01 December 2025 - 28 February 2026

Risk documented after surgery

National mean 56%
Number of patients included 97
Data completeness 100%

Admitted to critical care following surgery when the risk of death \geq 5% (Excludes patients who died in theatre or with a decision to palliate)
01 December 2025 - 28 February 2026

Admitted to Critical Care (risk of death \geq 5%)

National mean 64%
Number of patients included 60
Data completeness 100%

Consultant surgeon and anaesthetist present in theatre when risk of death \geq 5%
01 December 2025 - 28 February 2026

Consultant Anaesthetist & Consultant Surgeon in theatre (risk of death \geq 5%)

National mean 80%
Number of patients included 59
Data completeness 78%
