

Explanatory Notes

All cases admitted to hospital between 01 July 2025 and 30 September 2025 have been included. Only cases where the necessary data are available have been included in the denominator for each individual analysis.

The results for process measures for which fewer than 10 cases have available data will not be reported. Instead value will be marked as 'Insufficient data'.

For this report runcharts are compared to national quartiles.

For better insight to how these standards have been structured, please refer to the **NELA standards document**.

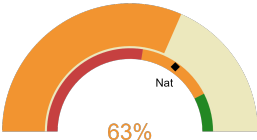

NHS Norfolk And Waveney Integrated Care Board

2025-26 Reporting Period 6: 01 July 2025 - 30 September 2025

These plots represent patients having an emergency laparotomy during Year 2025-26 Reporting Period 6 of NELA data collection.

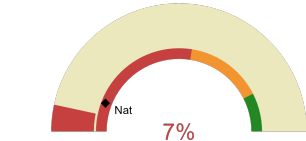

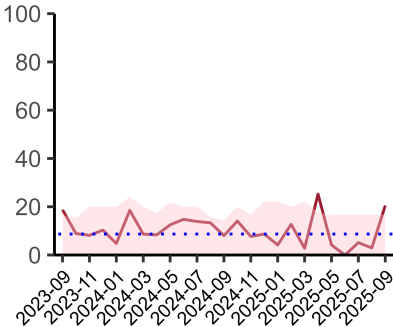

NELA process and outcome measures

Estimated case ascertainment
01 July 2025 - 30 September 2025

**Estimated Case Ascertainment
(Based on HES Data)**

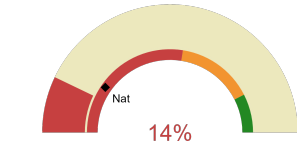

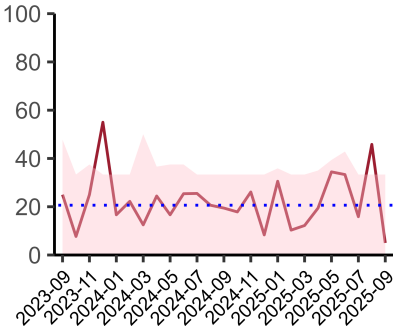

Expected number of cases 161
Total cases entered 108
Cases locked 107
Cases unlocked 1

Proportion of patients who had a CT scan that was reported by senior radiologist and communicated with the team in the correct time scale before surgery
01 July 2025 - 30 September 2025

CT reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale before surgery.

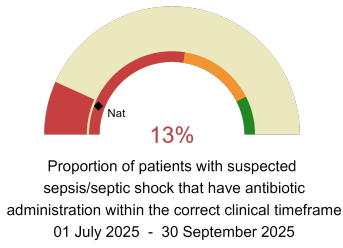

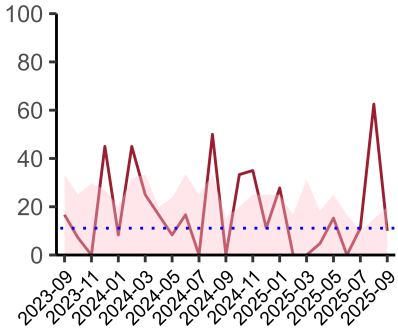

National mean 12%
Number of patients included 83
Data completeness 100%

Proportion of patients with suspected sepsis/septic shock or infection that have antibiotic administration within the correct clinical timeframe
01 July 2025 - 30 September 2025

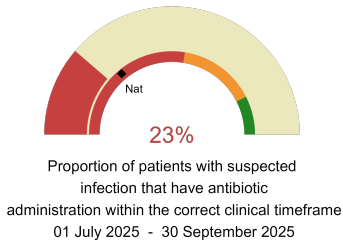

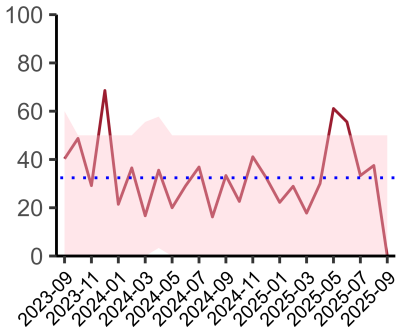

Combined Infection management standard - antibiotic administration within the correct clinical timeframe

National mean 19%
Number of patients included 42
Data completeness 100%

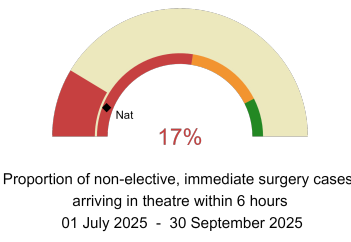

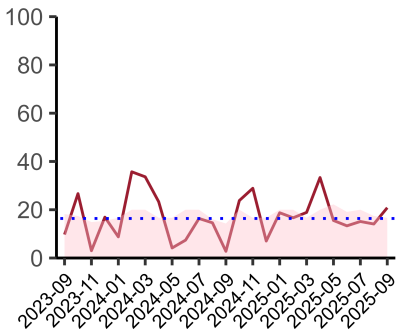

Sepsis/septic shock - antibiotic administration within the correct clinical timeframe

National mean 12%
Number of patients included 23
Data completeness 100%

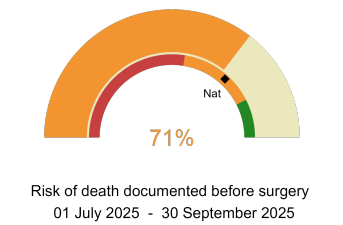

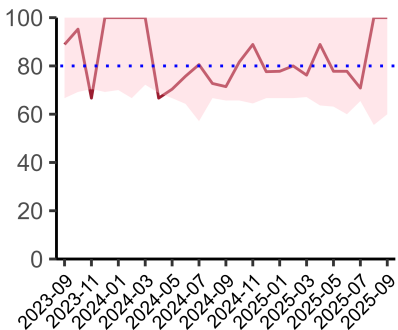

Infection - antibiotic administration within the correct clinical timeframe

National mean 28%
Number of patients included 19
Data completeness 32%

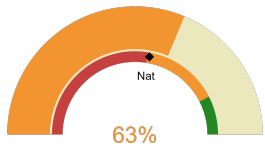

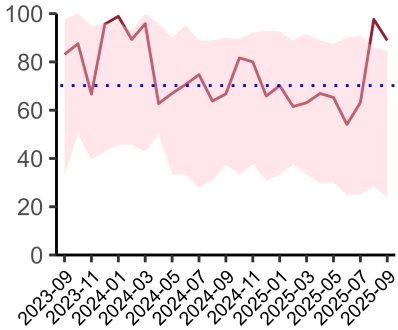

Timeliness - proportion of patients arriving in theatre according to correct clinical timeframe.

National mean 12%
Number of patients included 60
Data completeness 100%

Risk documented before surgery

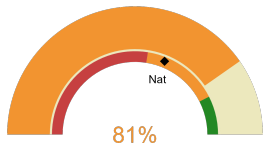

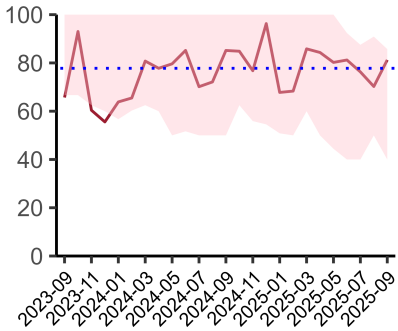

National mean 73%
Number of patients included 108
Data completeness 100%

Risk of death documented after surgery
01 July 2025 - 30 September 2025

Risk documented after surgery

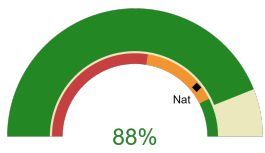

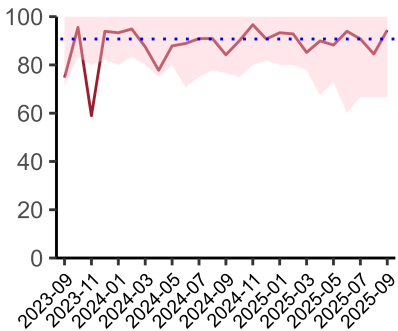

National mean 56%
Number of patients included 108
Data completeness 100%

Admitted to critical care following surgery when the risk of death \geq 5% (Excludes patients who died in theatre or with a decision to palliate)
01 July 2025 - 30 September 2025

Admitted to Critical Care (risk of death \geq 5%)

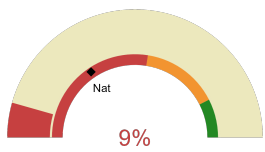

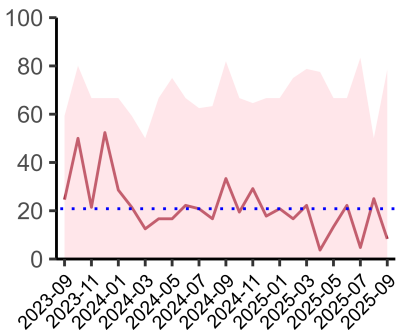

National mean 62%
Number of patients included 62
Data completeness 100%

Consultant surgeon and anaesthetist present in theatre when risk of death \geq 5%
01 July 2025 - 30 September 2025

Consultant Anaesthetist & Consultant Surgeon in theatre (risk of death \geq 5%)

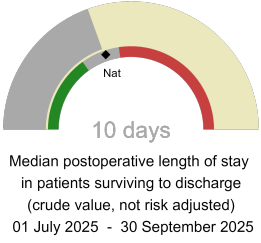

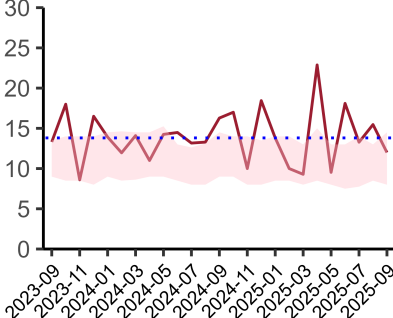

National mean 79%
Number of patients included 61
Data completeness 85%

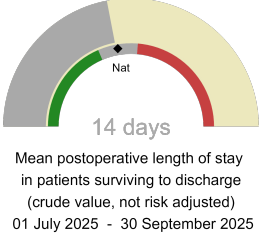

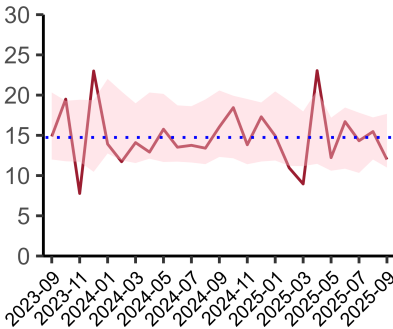

Perioperative assessment by a care of the older person specialist
01 July 2025 - 30 September 2025

Perioperative Assessment by a member of the geriatrician-led multidisciplinary team for patient aged 65 or over and frail (CFS \geq 5) or 80+

National mean 31%
Number of patients included 37
Data completeness 100%

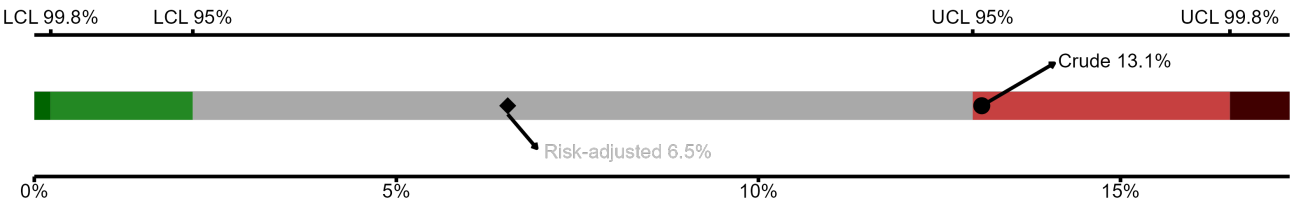

Median postoperative Length of Stay
National median 10 days
Number of patients included 92
Data completeness 100%

Mean postoperative Length of Stay
National mean 14 days
Number of patients included 92
Data completeness 100%

Risk-Adjusted Mortality

Number of patients included 107 | 30-day risk-adjusted mortality rate 6.5% | National 30-day mortality rate 7.2%

Integrated Care Board

NHS Norfolk And Waveney Integrated Care Board ICB comprises The Queen Elizabeth Hospital - King's Lynn, James Paget University Hospital, Norfolk and Norwich University Hospital.
