

Explanatory Notes

All cases admitted to hospital between 01 May 2024 and 31 July 2024 have been included. Only cases where the necessary data are available have been included in the denominator for each individual analysis.

The results for process measures for which fewer than 10 cases have available data will not be reported. Instead value will be marked as 'Insufficient data'.

At ICB level, runcharts are compared to national quartiles.

For better insight to how these standards have been structured, please refer to the **NELA standards document**.

NHS North Central London Integrated Care Board

2024-25 Reporting Period 2: 01 May 2024 - 31 July 2024

These plots represent patients having an emergency laparotomy during Year 2024-25 Reporting Period 2 of NELA data collection. This version will be made publicly available via the NELA website. Feedback from participating ICBs and hospitals is welcome.

NELA process and outcome measures

Estimated case ascertainment
01 May 2024 - 31 July 2024

Estimated Case Ascertainment (Based on HES Data)

Expected number of cases 144
Total cases entered 109
Cases locked 18
Cases unlocked 91

Proportion of patients who had a CT scan that was reported by senior radiologist and communicated with the team in the correct time scale before surgery
01 May 2024 - 31 July 2024

CT reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale before surgery.

National mean 11%
Number of patients included 45
Data completeness 98%

Proportion of patients with suspected sepsis or infection that have antibiotic administration within the correct clinical timeframe
01 May 2024 - 31 July 2024

Combined Infection management standard - antibiotic administration within the correct clinical timeframe

National mean 25%
Number of patients included 21
Data completeness 59%

Proportion of patients with suspected septic shock that have antibiotic administration within the correct clinical timeframe
01 May 2024 - 31 July 2024

Septic Shock - antibiotic administration within the correct clinical timeframe

National mean 20%
Number of patients included 6
Data completeness 53%

Proportion of patients with suspected sepsis that have antibiotic administration within the correct clinical timeframe
01 May 2024 - 31 July 2024

Sepsis - antibiotic administration within the correct clinical timeframe

National mean 22%
Number of patients included 11
Data completeness 57%

Proportion of patients with suspected infection that have antibiotic administration within the correct clinical timeframe
01 May 2024 - 31 July 2024

Infection - antibiotic administration within the correct clinical timeframe

National mean 36%
Number of patients included 19
Data completeness 60%

Proportion of non-elective, immediate surgery cases, arriving in theatre within 6 hours
01 May 2024 - 31 July 2024

Timeliness - proportion of patients arriving in theatre according to correct clinical timeframe.

National mean 8%
Number of patients included 43
Data completeness 100%

Risk of death documented before surgery
01 May 2024 - 31 July 2024

Risk documented before surgery

National mean 69%
Number of patients included 109
Data completeness 100%

Risk of death documented after surgery
01 May 2024 - 31 July 2024

Risk documented after surgery

National mean 52%
Number of patients included 109
Data completeness 100%

Admitted to critical care following surgery when the risk of death ≥ 5% (Excludes patients who died in theatre or with a decision to palliate)
01 May 2024 - 31 July 2024

Admitted to Critical Care (risk of death ≥ 5%)

National mean 52%
Number of patients included 87
Data completeness 100%

Consultant surgeon and anaesthetist present in theatre when risk of death ≥ 5%
01 May 2024 - 31 July 2024

Consultant Anaesthetist & Consultant Surgeon in theatre (risk of death ≥ 5%)

National mean 71%
Number of patients included 96
Data completeness 88%

Perioperative assessment by a care of the older person specialist
01 May 2024 - 31 July 2024

Perioperative Assessment by a member of the geriatrician-led multidisciplinary team for patient aged 65 or over and frail (CFS ≥ 5) or 80+

National mean 26%
Number of patients included 29
Data completeness 51%

Median postoperative length of stay in patients surviving to discharge (crude value, not risk adjusted)
01 May 2024 - 31 July 2024

Mean postoperative Length of Stay

National median 10 days
Number of patients included 29
Data completeness 95%

Mean postoperative length of stay in patients surviving to discharge (crude value, not risk adjusted)
01 May 2024 - 31 July 2024

Median postoperative Length of Stay

National mean 15 days
Number of patients included 29
Data completeness 95%

Integrated Care Board

NHS North Central London Integrated Care Board ICB comprises Barnet Hospital, University College Hospital, Whittington Hospital, North Middlesex University Hospital, Royal Free Hospital.
