

Explanatory Notes

All cases (locked and unlocked) admitted to hospital between 01 December 2024 and 28 February 2025 have been included. Only cases where the necessary data are available have been included in the denominator for each individual analysis.

At hospital level, runcharts are compared to hospitals within the same ICB.

The results for process measures for which fewer than 10 cases have available data will not be reported. Instead the value will be marked as 'Insufficient data'.

The NELA standards include a newly updated composite standard for CT Scanning and Reporting. The new standard is composed of three metrics: (1) the proportion of patients who had a CT scan that was reported by senior radiologist (ST3+), (2) the proportion of those reported within an hour or less of the scan, and (3) the proportion of those communicated preoperatively between a senior radiologist (ST3+) and senior surgeon (ST3+) to discuss the CT findings.

NOTE: due to changes in database structure, time related metrics may be calculated even if a time (NOT date) stamp is not entered. When time is entered as "00:00" and the "Time not known" box is not ticked, this time-stamp will be used for the standard calculation and may negatively affect reported metrics. We would therefore request that every effort is made to enter the time-stamps for the following variables:

- Date and Time of admission to hospital (Q1.9),
- Date and time of CT scan (Q2.7d),
- Date and time CT scan was reported (Q2.7e),
- Date and time of first dose of antibiotics (Q2.10),
- Date and time arrival in theatre (Q4.1).

For better insight to how these standards have been structured, please refer to the **NELA standards document**.

St Thomas' Hospital

2024-25 Reporting Period 9: 01 December 2024 - 28 February 2025

These plots represent patients having an emergency laparotomy during Year 2024-25 Reporting Period 9 of NELA data collection. This version will be made publicly available via the NELA website. Feedback from participating hospitals is welcome.

NELA process and outcome measures

Estimated case ascertainment
01 December 2024 - 28 February 2025

**Estimated case ascertainment
(Based on HES/PEDW Data)**

Expected number of cases 38
Total cases entered 31
Cases locked 5
Cases unlocked 26

Proportion of patients who had a CT scan that was reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale before surgery
01 December 2024 - 28 February 2025

CT reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale before surgery.

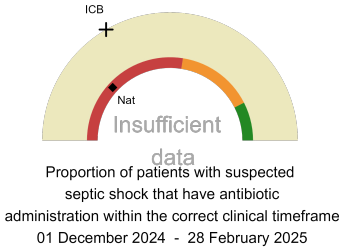

National mean 14%
ICB mean 26%
Number of patients included 10
Data completeness 95%

Proportion of patients with suspected sepsis or infection that have antibiotic administration within the correct clinical timeframe
01 December 2024 - 28 February 2025

Combined Infection management standard - antibiotic administration within the correct clinical timeframe

National mean 23%
ICB mean 32%
Number of patients included 4
Data completeness 14%

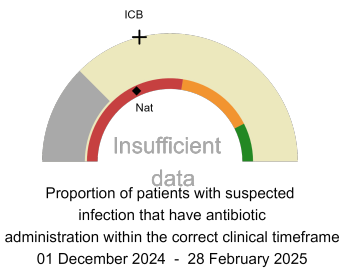

Septic Shock - antibiotic administration within the correct clinical timeframe

National mean 24%
ICB mean 33%
Number of patients included 0
Data completeness 0%

Sepsis - antibiotic administration within the correct clinical timeframe

National mean 17%
ICB mean 46%
Number of patients included 1
Data completeness 4%

Infection - antibiotic administration within the correct clinical timeframe

National mean 36%
ICB mean 42%
Number of patients included 4
Data completeness 14%

Non-elective, immediate surgery cases, arriving in theatre within 6 hours.

National mean 11%
ICB mean 10%
Number of patients included 8
Data completeness 100%

Risk of death documented before surgery
01 December 2024 - 28 February 2025

Risk documented before surgery

National mean 75%
ICB mean 71%
Number of patients included 31
Data completeness 100%

Risk of death documented after surgery
01 December 2024 - 28 February 2025

Risk documented after surgery

National mean 56%
ICB mean 41%
Number of patients included 31
Data completeness 100%

Admitted to critical care following surgery when the
risk of death \geq 5% (Excludes patients who
died in theatre or with a decision to palliate)
01 December 2024 - 28 February 2025

**Admitted to Critical Care
(risk of death \geq 5%)**

National mean 61%
ICB mean 53%
Number of patients included 27
Data completeness 100%

Consultant surgeon and anaesthetist present in
theatre when risk of death \geq 5%
01 December 2024 - 28 February 2025

**Consultant Anaesthetist &
Consultant Surgeon in theatre
(risk of death \geq 5%)**

National mean 78%
ICB mean 69%
Number of patients included 20
Data completeness 65%

Perioperative Assessment by a member of the geriatrician-led multidisciplinary team for patient aged 65 or over and frail (CFS ≥ 5) or 80+

National mean 28%
ICB mean 28%
Number of patients included 1
Data completeness 4%

Median postoperative length of stay

National median 10 days
ICB median 15 days
Number of patients included 26
Data completeness 96%

Mean postoperative length of stay

National mean 15 days
ICB mean 18 days
Number of patients included 26
Data completeness 96%

Integrated Care Board

St Thomas' Hospital is part of the NHS South East London Integrated Care Board ICB. This comprises The Princess Royal University Hospital, Queen Elizabeth Hospital (Lewisham and Greenwich NHS Trust), St Thomas' Hospital, Harefield Hospital, King's College Hospital, University Hospital Lewisham.
