

## Explanatory Notes

All cases (locked and unlocked) admitted to hospital between 01 November 2024 and 30 April 2025 have been included. Only cases where the necessary data are available have been included in the denominator for each individual analysis.

At hospital level, runcharts are compared to hospitals within the same ICB.

The results for process measures for which fewer than 10 cases have available data will not be reported. Instead the value will be marked as 'Insufficient data'.

The NELA standards include a newly updated composite standard for CT Scanning and Reporting. The new standard is composed of three metrics: (1) the proportion of patients who had a CT scan that was reported by senior radiologist (ST3+), (2) the proportion of those reported within an hour or less of the scan, and (3) the proportion of those communicated between a senior radiologist (ST3+) and senior surgeon (ST3+) to discuss the CT findings.

*NOTE:* due to changes in database structure, time related metrics may be calculated even if a time (NOT date) stamp is not entered. When time is entered as "00:00" and the "Time not known" box is not ticked, this time-stamp will be used for the standard calculation and may negatively affect reported metrics. We would therefore request that every effort is made to enter the time-stamps for the following variables:

- Date and Time of admission to hospital (Q1.9),
- Date and time of CT scan (Q2.7d),
- Date and time CT scan was reported (Q2.7e),
- Date and time of first dose of antibiotics (Q2.10),
- Date and time arrival in theatre (Q4.1).

For better insight to how these standards have been structured, please refer to the **NELA standards document**.

## Derriford Hospital

### 2025-26 Reporting Period 1: 01 November 2024 - 30 April 2025

These plots represent patients who did NOT have an emergency laparotomy during Year 2025-26 Reporting Period 1 of NELA data collection. This version will be made publicly available via the NELA website. Feedback from participating hospitals is welcome.

#### NELA process and outcome measures

**Risk documented prior to non-operative decision.**

National mean 70%  
ICB mean 88%  
Number of patients included 18  
Data completeness 100%

**Formal assessment of frailty documented.**

National mean 78%  
ICB mean 96%  
Number of patients included 14  
Data completeness 100%

**CT reported by a senior radiologist (ST3+) and communicated with the team in the correct time scale.**

National mean 18%  
ICB mean 17%  
Number of patients included 17  
Data completeness 88%

**Advance care plans to support the decision-making process.**

National mean 85%  
ICB mean 68%  
Number of patients included 18  
Data completeness 100%

**Individualised end-of-life care plan documented for patients recognised to be dying.**

National mean 77%  
ICB mean 92%  
Number of patients included 12  
Data completeness 100%

**Direct input by a member of a palliative care team for patients who have died in hospital.**

National mean 51%  
ICB mean 56%  
Number of patients included 12  
Data completeness 100%

**Median post-admission length of stay**

National median 11 days  
ICB median 9 days  
Number of patients included 6  
Data completeness 100%

**Mean post-admission length of stay**

National mean 11 days  
ICB mean 11 days  
Number of patients included 6  
Data completeness 100%

**Median post-decision to not operate length of stay**

National median 7 days  
ICB median 5 days  
Number of patients included 6  
Data completeness 100%

**Mean post-decision to not operate length of stay**

National mean 8 days  
ICB median 5 days  
Number of patients included 6  
Data completeness 100%

**Integrated Care Board**

Derriford Hospital is part of the NHS Devon Integrated Care Board ICB. This comprises Torbay District General Hospital, North Devon District Hospital, Derriford Hospital, Royal Devon and Exeter Hospital.
